Crypto APIs

Crypto API is an advanced infrastructure layer that allows the development of Blockchain & Crypto applications much faster and easier.

Our team has years of experience in software development with a focus on creating products from scratch.

With the recent release of Crypto APIs 2.0 we now require an experienced Junior Dev. To join our team, we require a technical task to be developed in order to see your style of coding, choice of technologies, etc.

Please complete the following task as described:

1. Create a simple REST API for news. Each entity should contain the following information: id, date, title, short description, text.
2. All requests and responses should be in JSON.
3. API results should be sortable by date and/or title.
4. API results may be filtered by date and/or title.
5. You can use a framework and database of your choice.

Thank you for applying to be a part of our team and wish you good luck at this task.
